POD2019-00152
<Preliminary Plan Review>
Zoning: R-5

Per previous conversations, and the “Security Plan” submitted in February 2018, the “Plan” identified the primary neighborhood entrance would be at the intersection of Delmont Street and E. Laburnum Avenue. At this entrance, there would be a guard station where the guard would take ID’s. The northern-most intersection of Delmont Street and Oronoco Avenue would be closed and greenspace would replace the asphalt, curb and gutter where Delmont Street currently cuts through the neighborhood. All other vehicular egress points to the middle section of the neighborhood would be closed.

The proposed fencing plan does not reflect the points of the previously submitted security plan. Has the security plan for this neighborhood changed? If so, please provide updated information for review by the Police Division. Until then, we cannot endorse the current proposal.

Thank you,
