Dear Mr. Bushey:

The Department of Public Utilities has made a brief review of the water and sewer plans that are part of the site plan submitted to the Planning Department on February 25, 2022 and received by DPU on March 1, 2022.

DPU recommends approval of these plans by the Planning Commission.

DPU will conduct a more complete review of the submitted construction plans and responses to our previous comments made on November 24, 2021 within the next 2 weeks and will respond accordingly on outstanding design issues.

If you have any questions concerning the above noted comments or the plans, please contact me at 501- 4501 or Ireini Botros at 501- 4512.

Sincerely,

*John L. Clark*
